

## **9-1-1 Service to Grand Forks**

Starting May 12, 2003, residents may dial 9-1-1 for police, ambulance and fire emergencies.

In order for emergency service providers, including the RCMP, the BC Ambulance Service and the Fire Department, to respond to an emergency as quickly as possible, it is imperative that all buildings—both residences and businesses - have their house number or street address clearly marked in a visible location. It is also important that these numbers are in a well-lit location to ensure that they are visible at night as well as in the daytime. If you are unsure of your correct house number contact City Hall.

The City is encouraging all householders and business owners to place large numbers on their building to clearly identify the correct address. This will save valuable time in an emergency and could save a life.
